

Formation of Canada

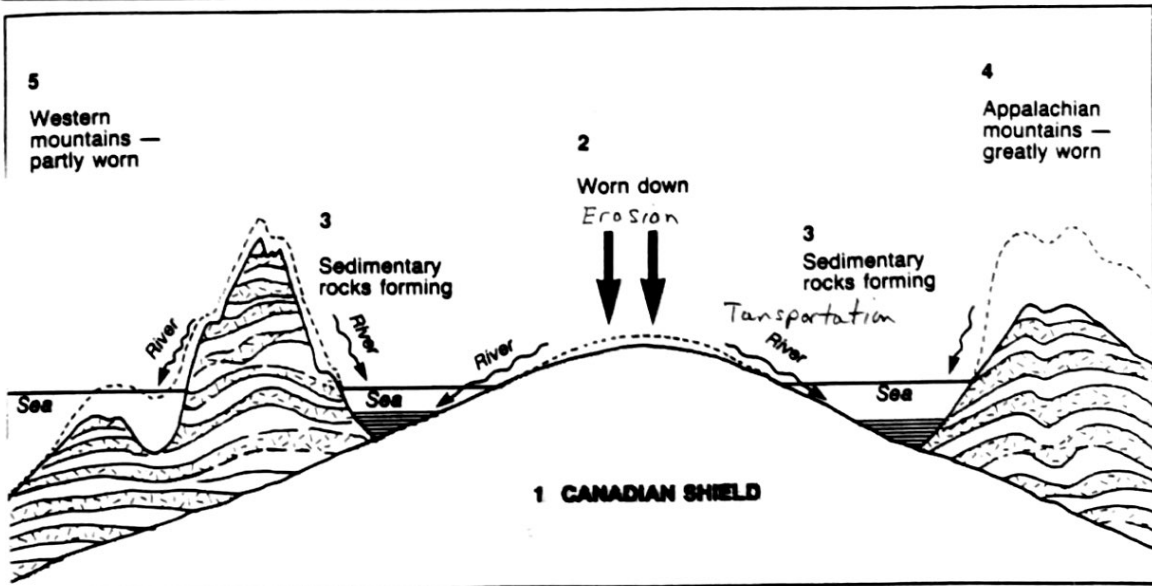

A1. Canadian Shield is formed 2.5 billion years ago

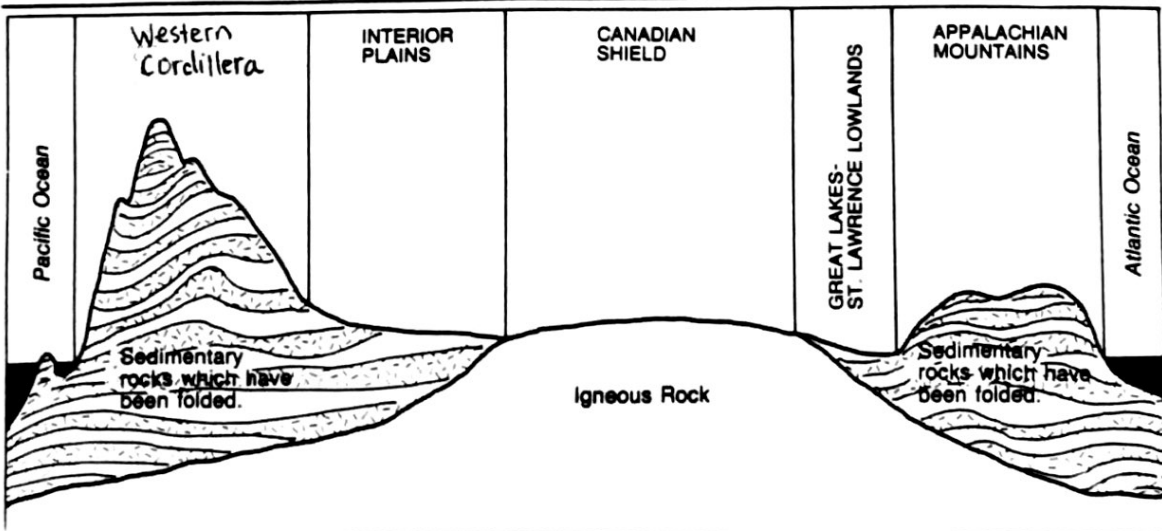

2. Erosion of the Canadian Shield
↳ the wearing away of the earth's surface by winds, moving water (river, waves), ice & gravity to produce sediments

Sediment: Tiny particles of rock
• Sediment deposited off all coasts creating layers of sedimentary rock!

B. Folding occurs off all coasts
• Faulting and Volcanic activity occur next

• Final stage of Canada [Landform Regions]
